A Refreshing New Idea in Marketing!

Custom Label
Bottled Water

These days it seems as though bottled water is everywhere. People are carrying it to the beach, gym, golf course, to work or just out for their evening walk. A custom labeled bottle of water can take your business to places you may never have thought of or had the ability to advertise before.

Having completed hundreds of labels for national brands and small organizations alike, Waterro Corporation has obtained the experience and expertise to assure you a product second to none - on time and on budget. From small orders of only a few hundred bottles, to larger production runs in the thousands of cases, we've done it all and guarantee a refreshing, high quality product, every time.

Years of experience in the advertising industry support an in-house design department that can produce an array of label styles catering to the unique needs of all our customers. Everything from a simple two-colour label, to the most elaborate full-color, photo quality label imaginable. Our innovative team will customize a label specific to the target you wish to reach.

Once your label has been completed, Waterro Corporation's bottling facility uses a multi-step system that includes Reverse Osmosis and ozone as our primary forms of water purification. The water is then bottled in sizes ranging from 355 ml to 2 litre using state-of-the-art automated equipment. A certified plant manager ensures that your product is packaged in accordance with the Canadian & International Bottled Water Associations guidelines.

Rounding off our list of services, Waterro Corporation has created unique product and label inventory programs to eliminate your need to store large quantities of bottled water. We offer scheduled local delivery service, and nation wide shipping to ensure your product is there when you need it.

Stand out from the crowd and your competition with a custom labeled bottle of water.
